DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-90, drawn to method of encapsulating, classified in class 438, subclass 126.
- II. Claim 91-98, drawn to molding apparatus to form shaped article for semiconductor device, classified in class 264, subclass 272.17.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case in claim 1, lines 4-5, "introducing a flowable material onto said at least one surface of said at least one substrate in a substantially vertical direction in said mold cavity" may be formed with a gate at an upper portion of the cavity as opposed to claim 91, line 6, "at least one gate at a lower portion of said at least one cavity".

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Art Unit: 2823

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
